Testimonials for *Conversations with The Mysterious One*

www.TheMysteriousOne.org

“Here, in this book, you will find timeless wisdom integrated with practical every day advice about living in this physical Universe. It's been quite awhile for me since the last time I read something so close to the 'source' that I was taken by surprise. For those of you on the path, integrating fragmented aspects of your psyche, moving towards Oneness, I highly recommend reading this book to absorb its message into your journey. If you have read as many spiritual self-help books as I have, then you're

probably on the lookout for something new and exciting. This may be the single biggest reason that I recommend this book, because it brings you closer to the process of ascension and the balancing of your energy bodies in a new way.”

- **Christopher A. Pinckley**, author of *Reality Creation 101*

“Reason or emotion? Body or mind? Ecstasy or asceticism? Duality or singularity? Family life or hermit? In his book *Conversations with The Mysterious One*, Amitt Parikh looks after these and further questions, which have to be settled by any modern practitioner of spirituality. From the beginning, the silent wisdom brilliantly lets the variety of cultural, religious and scientific knowledge of past and present, East and West, merge into the simple and meditative realization of ‘I AM.’ It’s about recognizing and realizing it in every breath, every thought, every meal, and every act in everyday life. That’s why this book is not only a fascinating spiritual edification and a guide, but also a plea for ecological, economic and social responsibility.”

- **Floco Tausin**, author of *Mouches Volantes: Eye Floaters as Shining Structures of Consciousness*
